DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II (claims 12-18) and cancellation of the none elected claims in the reply filed on 08/30/2004 is acknowledged.

Claim Objections

Claim 13 is objected to because of the following informalities:

In (claim 13, line 3) delete "rotapanell" an instead insert --rotatably--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-14 and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Tisma (6,195,959).

Tisma discloses an automatic packaging machine for forming a latching flip-top box from a blank comprising a conveyor system (Figs. 9 and 9A); a plurality of mandrels coupled to the conveyor system (Fig. 9; via mandrels 100), each of the plurality of mandrels comprising a mounting block (Fig. 4; via 102) for coupling the mandrel (100) to the automatic packaging machine, a package-holding assembly (Fig. 4; via 104) operatively connected to the mounting block (Fig. 7B), the package-holding assembly rotatable about a first axis from a first position to a second position (Figs. 7B, 9, and 9A; via with respect to the conveyor rotation and in respect to

Art Unit: 3721

chain 108); and a flap holder assembly operatively connected to the mounting block (Fig. 4; via 106), the flap holder assembly rotatable about a second axis substantially perpendicular to the first axis (Fig. 7A; via by pivot by 110), a plurality of plows, each of the plurality of plows manipulating a portion of the blank in order to form portions of the box (column 1, lines 29 and 30); and a plurality of tucker assemblies, each of the plurality of plows manipulating a portion of the blank in order to form portions of the box (Fig. 9; via tucker disk 216).

Regarding claim 13: wherein each of the plurality of mandrels includes a lateral support member (Fig. 7B; via bracket 109) coupled to the mounting block (102), wherein the package-holding assembly (104) is rotatably connected to the lateral support member (via with respect to the rotation of chain 108).

Regarding claim 14: wherein each of the plurality of mandrels includes means for maintaining the package-holding assembly in the first position relative to the lateral support member (Figs. 7A and 9; via through 102).

Regarding claim 16: wherein the package- holding assembly comprises a plurality of gripping arms, the plurality of gripping arms selectively permitting a package blank to be captured by the package-holding assembly (Fig. 4; via arms 204 and 206).

Regarding claim 17: wherein the package- holding assembly further comprises a guide mechanism positioned within the plurality of gripping arms, the guide mechanism holding the package blank during the assembly thereof (Fig. 4; via the bar between gripping arms).

Regarding claim 18: wherein the flap holder assembly includes a plurality of side arms for manipulating portions of the blank (Figs. 4 and 7B; via arms extending out of 106).

Art Unit: 3721

Allowable Subject Matter

Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
